YINGQING QIU
METIS DATA SCIENCE BOOTCAMP

INTRODUCTION

GOAL:

Provide data analysis support for **social scientists** and **psychologists** to study how people express emotions and what they are most caring about when catastrophic events happen.

DESIGN:

- Topic Modeling
- Dynamic Topic Modeling
- Sentiment Analysis

supermarket, social, home,
staff

TOILET PAPER

roll, peopl, hand, toilet,
paper, buy, shortag, water,
hoard

DYNAMIC TOPIC MODELING

SENTIMENT ANALYSIS

Given sentiments in March and April 2020

Predicted by **VADER**: -0.05~0.05

NEGATIVE
34%

CONCLUSIONS

- PANIC, GROCERY, RETAIL, SOCIAL, and TOILET PAPER are the five top topics.

- RETAIL has the most obvious rising trends among the top topics with the increasing of COVID cases.

- The sentiment does not obviously vary with time, while more people remain at a positive stage.

NEXT STEPS

- Including Geographic effects.
- Consider government mask requirements
